

ABSTRACT OF THE DISCLOSURE

An integrated accessory for a host device includes a media decoder, a battery coupled to the media decoder operationally to provide power to the media decoder, and a connector to couple the accessory to a host device. Within the integrated accessory, the battery is coupled to the connector so as to allow the battery operationally to provide power to the host device, in addition to the media decoder. In one embodiment, the battery, the media decoder and the connector are integrated within a housing that is configured to be removably coupled to the host device. The host device may be a portable device (e.g., a notebook computer, PDA, a mobile phone, a wristwatch, a camera, etc.).
